

Time to patient-reported flare

Haemoglobin [0,130] [130,139] [139,147] [147,278]

Number at risk

Haemoglobin	0	200	400	600	800
[0,130]	189	151	122	101	0
[130,139]	262	218	192	172	0
[139,147]	229	194	172	161	0
[147,278]	293	259	241	222	0

Time from study recruitment (days)

Detailed description: This table provides the number of patients at risk at four time points (0, 200, 400, 600, 800 days) for each haemoglobin stratum. The '0' row represents the total number of patients at each time point. The 'Haemoglobin' column labels the strata. The data shows that the number of patients at risk generally decreases over time, particularly after 400 days, with the [0,130] group showing the most significant drop.
