

Time to objective flare

Red meat intake quantiles + [0,0.369) + [0.369,0.875) + [0.875,9.11]

Number at risk

| Red meat intake quantiles | 0 | 500 | 1000 | 1500 | 2000 |
|---------------------------|-----|-----|------|------|------|
| [0,0.369) | 402 | 370 | 290 | 148 | 19 |
| [0.369,0.875) | 202 | 182 | 145 | 75 | 7 |
| [0.875,9.11] | 204 | 180 | 140 | 76 | 5 |

Time from study recruitment (days)

Detailed description: This table provides the 'Number at risk' for each red meat intake quantile group at various time points. The data is presented in a grid where rows represent quantiles and columns represent time points (0, 500, 1000, 1500, 2000 days). The numbers show a general decrease over time, with the highest intake group (orange) consistently having the lowest number at risk.
