Time from study recruitment (days)

Detailed description: This table provides the 'Number at risk' for each meat protein quantile group at three specific time points: 0 days, 500 days, and 1000 days. The data is also summarized for the 1500 and 2000 day marks. The [0,24.9) group consistently has the highest number at risk, while the [50.6,331] group shows the lowest number at risk across all time points.
