

Time to patient-reported flare

Fibre quantiles [0,17) [17,23.2) [23.2,29.5) [29.5,86.2]

Number at risk

Fibre quantiles	0	200	400	600	800
[0,17)	95	78	68	60	0
[17,23.2)	113	93	83	75	0
[23.2,29.5)	103	84	73	66	0
[29.5,86.2]	113	87	75	68	0

Time from study recruitment (days)

Detailed description: This table provides the 'Number at risk' for each fibre quantile group at four time points (0, 200, 400, 600 days) and at the end of the study (800 days). The 'Number at risk' is the count of patients who have not yet experienced the event (flare) by that specific time point. The table shows that the number of patients at risk decreases over time for all groups, with the [0,17) group having the lowest number of patients at risk after 600 days.
