

Time to hard flare

Fruit intake quantiles [0,2.1) [2.1,5.64) [5.64,10.4) [10.4,62.9]

Number at risk

Fruit intake quantiles	0	500	1000	1500	2000
[0,2.1)	114	101	81	38	5
[2.1,5.64)	144	123	99	55	6
[5.64,10.4)	134	118	80	54	2
[10.4,62.9]	152	129	100	46	5

Time from study recruitment (days)

This table provides the number of individuals at risk for each fruit intake quantile group at five specific time points: 0, 500, 1000, 1500, and 2000 days. The data shows that the number of individuals at risk generally decreases over time, particularly in the first 1000 days, and stabilizes thereafter. The 'Number at risk' table is positioned below the Kaplan-Meier plot, sharing the same x-axis scale.
