Detailed description: This is a 'Number at risk' table corresponding to the survival analysis above. It shows the number of patients at risk at three time points (0, 500, 1000, 1500, 2000 days) for four UPF groups. The groups are color-coded to match the survival plot: blue for [0,36.8), yellow for [36.8,44.3), orange for [44.3,52.6), and pink for [52.6,92.5]. The numbers show a general decline in the number of patients at risk over time, with the [0,36.8) group consistently having the lowest number of patients at risk.
