White meat intake quantiles [0,0.426) [0.426,1.06) [1.06,1.88) [1.88,11.9]

Number at risk

[0,0.426)	264	234	191	95	10
[0.426,1.06)	260	239	178	97	15
[1.06,1.88)	265	240	187	93	11
[1.88,11.9]	267	221	176	91	5

White meat intake quantiles

Time from study recruitment (days)

Detailed description: This table provides the number of individuals at risk for each white meat intake quantile at three specific time points: day 0, day 500, and day 1000. The data shows that the number of individuals at risk decreases over time, particularly after day 500, with the group in the highest intake quantile consistently having the largest number of individuals at risk throughout the study.
