

Time to objective flare

Bread/cereal intake quantiles [0,1.99] [1.99,3.28] [3.28,4.88] [4.88,13.2]

Number at risk

Bread/cereal intake quantiles	0	500	1000	1500	2000
[0,1.99]	199	182	141	76	9
[1.99,3.28]	202	179	143	70	5
[3.28,4.88]	203	187	146	72	8
[4.88,13.2]	204	184	145	81	9

Time from study recruitment (days)

Detailed description: This table provides the number of individuals at risk for each bread and cereal intake quantile group at three specific time points: day 0, day 500, and day 1000. At day 0, all four groups have 200+ individuals at risk. By day 500, the numbers decrease to approximately 180, 170, 185, and 180 for the respective groups. By day 1000, the numbers further decrease to approximately 140, 140, 145, and 140. The final column shows the number of individuals at risk at day 2000, which is slightly lower than at day 1000 due to censoring or loss to follow-up.
