Time from study recruitment (days)

Detailed description: This table provides the number of patients at risk for each fruit intake quantile group at four specific time points (0, 200, 400, 600, and 800 days) and at the end of the study. The 'Number at risk' column shows the count of patients remaining in the study for each group at each time point. The 'Time from study recruitment (days)' column serves as a reference for the time points shown in the adjacent survival plot.
