

Time to objective flare

Meat protein quantiles [0,24.9) [24.9,35.8) [35.8,50.6) [50.6,331]

Number at risk

Meat protein quantiles	0	500	1000	1500	2000
[0,24.9)	102	94	74	42	5
[24.9,35.8)	97	84	63	27	1
[35.8,50.6)	111	99	74	44	3
[50.6,331]	103	86	67	44	5

Time from study recruitment (days)

Detailed description: This is a 'Number at risk' table corresponding to the survival plot above. It shows the number of individuals at risk at three specific time points (0, 500, 1000, 1500, 2000 days) for four different meat protein quantile groups. The numbers generally decrease over time, indicating events (flares) have occurred.
