

Time to hard flare

Haemoglobin [0,130) [130,139) [139,147) [147,278]

Number at risk

Haemoglobin	[0,130)	[130,139)	[139,147)	[147,278]	
[0,130)	311	259	192	73	10
[130,139)	260	228	168	75	9
[139,147)	258	229	177	64	9
[147,278]	263	241	194	83	9

Time from study recruitment (days)

This table provides the number of individuals at risk for each haemoglobin group at various time points. The data is presented in five-year intervals, starting from the baseline and extending up to 2000 days. The total number at risk for each group remains relatively stable until approximately day 1000, after which it begins to decrease as individuals experience events or drop out of the study.
