

Time to patient-reported flare

Fish intake quantiles [0,16.4) [16.4,36.5) [36.5,65.8) [65.8,647]

Number at risk

Number at risk	0	200	400	600	800
[0,16.4)	268	215	184	166	0
[16.4,36.5)	275	228	200	189	0
[36.5,65.8)	270	217	187	168	0
[65.8,647]	273	212	178	161	0

Time from study recruitment (days)

Detailed description: This table provides the number of patients at risk at various time points for each fish intake quantile group. The groups are defined by the same quantiles as the survival plot. The number of patients at risk decreases over time for all groups, with the rate of decrease being steeper for higher fish intake quantiles. At day 0, all groups have 270-275 patients at risk. By day 200, the number has dropped to between 212 and 215. By day 400, it has dropped further to between 178 and 184. By day 600, it has dropped to between 161 and 166. By day 800, the number has dropped to zero for all groups.
